Connections

Sometimes technology is great and is easy to use in a lesson but technology is not always the best way to teach something or do something and we have to remember that especially in a day and age that technology is so omni present in our lives. So while yes sometimes technology is good and the most effective way sometimes it is not the most affective way and we have to make sure we can differentiate when it is and is not appropriate to use.

Questions

1. how do you come up with creative ideas that are different for every lesson
2. what is the best way to tell if a lesson is a effective or not effective in terms of student engagement

Realizations

I never realized how much time was put into creating these activities for each subject and unit and also how much they all intertwined and are used to enforce previous knowledge we had already learned.
